CUSTOM ENERGY MANAGEMENT APPROACH

BOTTLING PLANT CASE STUDY:

Managing electricity and natural gas purchasing, eliminating national and international market risks

- **\$2,600,000 annually**

Advocated to switch daily balanced natural gas meter to monthly balanced

- **\$35,000 annual savings**

Operation 25% Renewable through the purchase of RECs

- **\$13,000 annual cost**

Enrolled in Offsite solar subscription

- **\$50,000 annual savings**

Electricity capacity reduction program

- **\$45,000 annual savings**

Demand response

- **\$25,000 annual revenue**

Facilitated the construction and transition to an entirely new local microgrid to compensate for a whole new production line and serve the entire operation. This initiative included:

1. Immediate temporary power to run new plant production line.
2. Construction of a brand-new distribution line directly from local high voltage transportation line.
3. Construction of a 6MW substation owned and operated by client.
4. Negotiations with the utility mediated by NYS Public Service Commission for the purchase of utility assets.

OVERVIEW

Capital Energy Partners is an all-inclusive energy management firm. Our custom solution approach allows us to advocate on your behalf as owner's reps so your operations can continue to run effectively while taking control of ever-evolving energy markets. Brokering electricity and natural gas to reduce budget risks is only the first step.

We work with you to take control of your energy costs.
